Where reserves contribute to measured radiance change

2013–2024 OLS slopes · 4,426 assessable reserves · 560 positive · 75 negative · 3,791 zero

Circle area uses a square-root scale; minimum display area is 4 pt². Circles mark reserve centroids.

Main panel: mainland and Tasmania. Inset: the sole non-zero contributor outside this extent.

Grey shapes are protected-area footprints, not a land basemap. Overlapping designations remain separate.
