Department of Climate Change, Energy, the Environment and Water

Technical Specifications for the Collaborative Australian Protected Areas Database (CAPAD) 2024

The Collaborative Australian Protected Areas Database (CAPAD) 2024 provides both spatial and textual information about government, Indigenous and privately protected areas for Australia, in both the marine and terrestrial environments.

Data is current up to **30 June 2024** as supplied by contributing agencies. See Appendix 3 for details. Prior to the 2024 release, CAPAD was published in two separate datasets, CAPAD Terrestrial and CAPAD Marine. To improve ease of use, cartographic display, accurate area statistics and continuity of data across coastal areas, both terrestrial and marine protected areas for CAPAD 2024 will be published in one single spatial data layer. Statistics will continue to be reported separately for marine and terrestrial.

This is the fourteenth version of the terrestrial data, with previous versions released in 1997, 2000, 2002, 2004, 2006, 2008, 2010, 2012, 2014, 2016, 2018,2020 and 2022. This is the twelth version of the marine data, with previous versions released in 1997, 2002, 2004, 2008, 2010, 2012, 2014, 2016, 2018, 2020 and 2022.

CAPAD provides a snapshot of protected areas that meet the IUCN definition of a protected area:

> "A protected area is a clearly defined geographical space, recognised, dedicated and managed, through legal or other effective means, to achieve the long term conservation of nature with associated ecosystem services and cultural values."
> (IUCN Definition 2008)

CAPAD information on protected areas is made available on the Department of Climate Change, Energy, the Environment and Water's website as maps, in mapping applications, as summary area statistics (spreadsheets), and as spatial data and web map services that are openly available under CC-BY 4.0 licence.

A summary of the CAPAD data is published biennially at:
http://www.environment.gov.au/land/nrs/science/capad

All spatial data is available for download from the Find Environmental Data (FED) website:
http://www.environment.gov.au/fed/

February 2025

1. Data specifications

To enable effective integration, data should be supplied with the following specifications:

Data Format ArcGIS file geodatabase or shapefile format with table definitions as set out in point 2 of this document.

Dataset projection Supplied in the Geographic Coordinate System (unprojected) based on the GDA94 datum or GDA2020 (noting that the data will be reprojected to GDA94 for processing and publication).

Licence Data available for distribution under the Creative Commons Attribution (CC-BY) licence model.

2. GIS dataset items specifications and corresponding definitions

See ArcGIS file geodatabase template supplied with data request.

ITEM NAME	WIDTH	TYPE	No. dec

LATITUDE #	38	Number	6

generated by Department of Climate Change, Energy, the Environment and Water after supply

Item Name: PA_ID

Field Type: Alphanumeric (Upper – Lower case) (maximum 20 characters)
Definition: A unique code for the protected area that should persist between versions of CAPAD.
Note: In some cases this number will be generated by the DCCEEW and is generally based on the RES_NUMBER provided by the data custodian. For marine protected areas, the PA_ID is generally the first three digits of the PA_PID.

Item Name: PA_PID

Field Type: Alphanumeric (Upper – Lower case) (maximum 20 characters)
Definition: A unique code for a parcel or zone within a protected area that should persist between versions of CAPAD.
Note: For example, a terrestrial protected area with two zones share the same PA_ID and are assigned PA_PID values of *PA_ID*_a and *PA_ID*_b. If a protected area does not have multiple parts/zones then the PA_PID is by default the same as the PA_ID.
For marine protected areas, the first three digits of the PA_PID code (the PA_ID) are generally common to all component polygons of a single protected area, and the remaining digits are unique to the zone.

Item Name: NAME

Field Type: Alphanumeric (Upper – Lower case) (maximum 255 characters)
Definition: The official (gazetted) name of a protected area. Not all gazetted protected areas have a name; in which case they are titled “Unnamed” with a reserve number e.g. Unnamed HA1207.
Note: Text is presented in proper text format (e.g. Bernier and Dorre Islands). The Protected Area name should not include the type name unless it does not reflect its legal status. E.g. ‘Stray Creek Conservation Area’ has TYPE = Natural Catchment Area.

Item Name: TYPE

Field Type: Alphanumeric (Upper-Lower Case) (maximum 60 characters)
Definition: The type of protected area according to the establishment mechanism. E.g. National Park, Nature Refuge, Indigenous Protected Area
Note: Some State agencies for their own reasons may provide a TYPE category for an area that is not allocated an IUCN category (that is, it is not an area gazetted for biodiversity conservation). In such cases, the IUCN category will be listed as NR, NA or NAS (see below).
Note: See Appendix 1 for current protected area types and abbreviations for types.

Item Name: TYPE_ABBR

Field Type: Alphanumeric (AAAA) (UPPERCASE) (maximum 10 characters)
Definition: Abbreviation of **TYPE** (e.g. ‘P’ = ‘Park’, 'MP’ = ‘Marine Park’).
Note: See Appendix 1 for current type abbreviations.

Item Name: IUCN

Field Type: Alphanumeric (AAAA) (UPPERCASE) (maximum 3 characters)
Values: IA to VI, Not Reported, Not Applicable, Not Assigned
Definition: The IUCN protected area category ascribed by the managing authority. For more information refer to this publication: Dudley, N. (Editor) (2013). *Guidelines for Applying Protected Area Management Categories*. IUCN, Gland, Switzerland.

IUCN category	Definition	IUCN code
Ia	Strict Nature Reserve	Ia
Ib	Wilderness Area	Ib
II	National Park	II
III	Natural Monument or Feature	III
IV	Habitat/Species Management Area	IV
V	Protected Landscape/Seascape	V
VI	Protected area with sustainable use of natural resources	VI
Not Reported	For protected areas where an IUCN category is unknown and/or the data provider has not provided any related information.	NR
Not Applicable	Denotes an area that does not meet the NRS criteria or the IUCN definition of a protected area but has management complimentary to the NRS.	NA
Not Assigned	The protected area meets the standard definition of protected areas but the data provider has chosen not to use the IUCN Protected Area Management Categories.	NAS

Item Name: NRS_PA

Field Type: Text (AA) (UPPERCASE) (maximum 2 characters)
Definition: Indicates the status of the protected area in terms of meeting the standard for inclusion in the National Reserve System (NRS).
For terrestrial reserves refer to the document "Australia's Strategy for the National Reserve System 2009 – 2030".
Note: Protected areas that meet the standard for inclusion in the NRS (NRS_PA = 'Y' or 'I') are included in the terrestrial statistics.

NRS status	Description	NRS_PA code
Yes	The protected area has been assessed as a protected area that meets the standard for inclusion in the NRS	Y
Interim	The protected area has been assessed to meet the standard for inclusion in the NRS but has not been formally established as a protected area although binding agreements are in place for formal protection to occur in the future.	I

Item Name: NRS_MPA

Field Type: Text (AA) (UPPERCASE) (maximum 2 characters)
Definition: Indicates the status of the protected area in terms of meeting the standard for inclusion in the National Representative System of Marine Protected Areas (NRSMPA).
For marine reserves refer to the document "Guidelines for Establishing the National Representative System of Marine Protected Areas (NRSMPA)"

Note: Protected areas that meet the standard for inclusion in the National Representative System of Marine Protected Areas (NRSMPA) (NRS_MPA = 'Y') and Sea Country IPAs (NRS_MPA = 'I') are included in the marine statistics.

NRS status	Description	NRS_PA code
Yes	The protected area has been assessed as a protected area that meets the standard for inclusion in the NRSMPA	Y
No	The protected area been assessed not to meet the standard for inclusion in the NRSMPA but is managed for conservation without meeting the NRSMPA standard.	N
Interim	The protected area has been assessed to meet the standard for inclusion in the NRSMPA but has not been formally established as a protected area although binding agreements are in place for formal protection to occur in the future.	I
Not determined	The protected area is probably managed for nature conservation that has not been assessed to determine if it meets the standard for inclusion in the NRS.	ND

Item Name: GAZ_AREA

Field Type: Number to 2 decimal places
Definition: The area (to the nearest hectare) as described in the nomination document (e.g. parliamentary gazettal). Some protected areas do not have a specific area in the gazettal. Where a protected area has multiple internal zones the gazettal area can be reported as the total for the whole protected area.
Units: hectares to 2 decimal places

Item Name: GIS_AREA

Field Type: Number to 6 decimal places
Definition: The area of a protected area based on current spatial data calculated in the Albers Equal Area projection by DCCEEW using GIS software.
Units: hectares to 6 decimal places
Note: Both terrestrial and marine versions of CAPAD use this field when calculating area statistics for reporting purposes.

Item Name: GAZ_DATE

Field Type: Date format (DD/MM/YYYY)
Definition: Gazettal date of the original proclamation that established any form of protected area.

Item Name: LATEST_GAZ

Field Type: Date format (DD/MM/YYYY)
Definition: The date of the most recent gazettal or proclamation by the relevant authority to amend the protected area. It can be the same as the GAZ_DATE if there have been no changes or additions to the protected area.
Note: Default is the GAZ_DATE.

Item Name: STATE

Field Type: Text (AAA) (UPPERCASE) (maximum 3 characters)
Definition: The CODE for the State or Territory in which the Protected Area is located, regardless of governance.
Note: Terrestrial Commonwealth managed land is attributed with the name of the State / Territory in which it is physically located. Thus, Kakadu NP is listed within the NT, and Booderee NP is listed within the Jervis Bay Territory.
Marine Commonwealth managed protected areas are attributed with the name of 'COM' as they are generally within Commonwealth waters.

State name	STATE code
Australian Capital Territory	ACT
External Territory	EXT
Jervis Bay Territory	JBT
New South Wales	NSW
Northern Territory	NT
Queensland	QLD
South Australia	SA
Tasmania	TAS
Victoria	VIC
Western Australia	WA
Commonwealth	COM

Item Name: AUTHORITY

Field Type: Text (UPPERCASE) (maximum 15 characters)
Definition: The CODE for the authority that manages the Protected Area.
Note: See Appendix 2 for current AUTHORITY codes. New authority names can be added to this list.

Item Name: DATASOURCE

Field Type: Text (UPPERCASE) (maximum 20 characters)
Definition: The CODE for the agency that supplied the Protected Area data.
Note: See Appendix 3 for current DATASOURCE codes. New data source names can be added to this list.

Item Name: GOVERNANCE

Field Type: Text (A) (UPPERCASE) (maximum 1 character)
Definition: The CODE for the type of governance which has management and decision-making responsibility.

Governance type	Description	GOVERNANCE code
Community	Community conserved areas where indigenous peoples or local communities (settled or mobile) hold decision-making authority, responsibility and accountability.	C
Government	Protected areas with decision-making authority, responsibility and accountability in the hands of national, state or local government	G
Joint	Jointly managed protected areas where several social actors from different governance types share decision-making authority, responsibility and accountability. Joint management arrangements are recognised by a management board, agreement (e.g. ILUA) or other formal arrangement.	J
Private	Private protected areas where land and resource owners hold decision-making authority, responsibility and accountability.	P

Item Name: COMMENTS

Field Type: Alphanumeric (Upper – Lower case) (maximum 120 characters)
Definition: Extra information jurisdictions elect to supply.

Item Name: ENVIRON

Field Type: Text (A) (UPPERCASE) (maximum 1 character)

Definition: The code denotes the environment type conserved in the protected area as described by the data provider.

Note: If a protected area is coded as 'B' by the data provider, DCCEEW calculates the proportional representation of marine and terrestrial areas within the protected area (all component polygons combined). If less than 70% of protected area is marine, then the whole protected area is included in the terrestrial CAPAD statistics. If 70% or more of the protected area is marine then the whole protected area is included in the marine CAPAD statistics.

Environment type	Description	ENVIRON code
Terrestrial	Generally includes land and or water above high-water mark including aquatic ecosystems.	T
Marine	Generally includes land and or water below high-water mark and may include islands and reefs above high-water mark.	M
Both	Includes land and water both above and below the high-water mark. If less than 30% of the protected are in in the marine environment. The Protected Area will be included in the CAPAD terrestrial statistics.	B

Item Name: OVERLAP

Field Type: Numeric (maximum 3 characters)
Definition: Identifies if the protected area (or part of the protected area) is located within or over another protected area.
Note: Derived by DCCEEW. Prior to CAPAD 2024, the Overlap attribute was only included in terrestrial CAPAD.
The Overlap attribute deals with the 'stacked' nature of some terrestrial and marine protected areas so that overlaps can be 'flattened' for the purposes of calculating the protected area coverage of Australia.

Protected areas with NO overlaps will be allocated a value of "1". Generally, where two protected areas overlap, the area with the higher ranking (based on 'IUCN' category and 'TYPE') will be allocated a value of "1" for the overlap field with the lower ranking area allocated a value of "2". For example, where a National Park (IUCN II) overlaps with a Nature Refuge (IUCN VI) the National Park will be allocated the value of "1" and the Nature Refuge will be allocated the value of "2". Where marine and terrestrial protected areas overlap in the coastal zone, terrestrial areas are prioritised for OVERLAP = 1.
The overlap ranking order is maintained by DCCEEW and can be provided to users on request.

For consistency with national scale products like IBRA and IMCRA (and area calculations for PA's across state borders) DCCEEW applies a 'clip' to the state borders component of the Geoscience Australia Australia's Land Borders dataset (reprojected to GDA94).

For the purpose of area calculations please be aware of this attribute. Users may wish to use the following SQL statement: Select * from CAPAD where OVERLAP = '1' AND NRS_PA IN ('Y', 'I') OR NRS_MPA IN ('Y', 'I').

Item Name: MGT_PLAN

Field Type: Text (A) (UPPERCASE) (maximum 2 characters)
Definition: The CODE for the status of the management plan for the protected area as of 30 June 2024.

Management plan status	Description	MGT_PLAN code
In Preparation	Some form of management document was being prepared.	P
Draft	A draft management document was released for comment by the public, management board or equivalent.	D
Statutory	Enabling legislation establishes the management of a protected area and a separate management document is not required	S
Management Intent	A formal statement of management intent has been prepared that clearly sets out the management objectives for the protected area but includes little else.	I
Management Plan	A formally adopted management plan that has been through consultation and contains strategies and actions for implementation for this protected area. A management plan may be for a group of protected areas with specific actions for each protected area in the plan.	M
Regional Plan	A formally adopted management plan has been through consultation and contains general strategies and actions for implementation over a group of protected areas.	R
Unknown	No form of management document could be found.	N
Under Review	The management plan is under review.	UR

Item Name: RES_NUMBER

Field Type: Alphanumeric (Upper – Lower case) (maximum 15 characters)

Definition: The reserve number (if declared) as used by the controlling authority. IPA Reserve numbers are allocated by DCCEEW.

Item Name: ZONE_TYPE

Field Type: Text (Upper – Lower case) (maximum 150 characters)
Definition: For Marine protected areas this is a concatenation of the ZONE (usually found in the COMMENTS field) and IUCN categories – for use when mapping the reserves.
Note: For example – 'Habitat Protection (IUCN VI)'. Reserves that do not contain zones have been coded as "Unassigned (IUCN *xx*)"
For terrestrial protected areas Zone Type should be left empty.

Item Name: EPBC

Field Type: Text (Upper – Lower case) (maximum 15 characters)
Definition: This identifies if the reserve can be considered under the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). Private, State and Indigenous protected areas are not considered protected matters under the EPBC Act.

Description	Code
Commonwealth reserve (either a Commonwealth National Park, Commonwealth Botanic Garden, Commonwealth Marine Reserve, Marine Park, Marine Sanctuary or Antarctic protected/managed reserve) – as outlined in Section 342 of the Act.	Commonwealth
Privately managed reserve – identified by GOVERNANCE = 'P'	Private
State managed reserve – as supplied by State/Territory authority	State
Indigenous Protected Area (IPA) or Sea Country IPA	Indigenous

Item Name: LONGITUDE

Field Type: Number (999.999999) to six decimal places
Definition: Longitude coordinate of polygon centroid in decimal degrees, derived by DCCEEW from Geographics projected dataset. Centroid position is forced to sit within the feature.

Item Name: LATITUDE

Field Type: Number (-99.999999) to six decimal places
Definition: Latitude coordinate of polygon centroid in decimal degrees, derived by DCCEEW from Geographics projected dataset. Centroid position is forced to sit within the feature.

3. Appendices

Appendix 1 - Current protected area types and abbreviations

TYPE_ABBR	TYPE
AA	Aboriginal Area
ACCP	Conservation Covenant
AMP	Australian Marine Park
AQR	Aquatic Reserve
ASMA	Antarctic Specially Managed Area
ASPA	Antarctic Specially Protected Area
BG	Botanic Gardens
BG_COM	Botanic Gardens (Commonwealth)
BSA	Biodiversity Stewardship Agreement
CA	Conservation Area
CAG	Conservation Agreement
CCA	Coordinated Conservation Area
CCAZ1	CCA Zone 1 National Park
CCAZ2	CCA Zone 2 Aboriginal Area
CCAZ3	CCA Zone 3 State Conservation Area
CMR	Commonwealth Marine Reserve
COR	Coastal Reserve
CP	Conservation Park
CR	Conservation Reserve
DPAA	Dugong Protection Area (A)
DPAB	Dugong Protection Area (B)
DS	Dolphin Sanctuary
FHAA	Fish Habitat Area (A)
FHAB	Fish Habitat Area (B)
FLR	Flora Reserve
FR	Forest Reserve
GR	Game Reserve
HA	Heritage Agreement
HIR	Historical Reserve
HR	Heritage River
HS	Historic Site
HTR	Hunting Reserve
IPA	Indigenous Protected Area

KCR	Karst Conservation Reserve
LS	Rock Lobster Sanctuary
MA	Management Area
MCA	Marine Conservation Area
MMA	Marine Management Area
MNP	Marine National Park
MNR	Marine Nature Reserve
MP	Marine Park
MS	Marine Sanctuary
NAP	Nature Park
NCA	Natural Catchment Area
NCR	Nature Conservation Reserve
NCTA	NCT Agreement
NFR	Natural Features Reserve
NP	National Park
NPA	National Park Aboriginal
NPC	National Park (Commonwealth)
NPS3	National Parks Act Schedule 3 Other Parks
NPS4	National Parks Act Schedule 4 park or reserve
NR	Nature Reserve
NRA	Nature Recreation Area
NREF	Nature Refuge
NRS	NRS Addition - Gazettal in Progress
NS	National Park (Scientific)
OCA	Other Conservation Area
OCA_NAP	Other Conservation Area or Nature Park
OP	Other
PNPA	Proposed National Parks Act park or park addition
PNR	Private Nature Reserve
PS	Private Sanctuary
RA	Reference Area
RCP	Recreation Park
REP	Regional Park
RNA	Remote and Natural Area - not scheduled under Nat Parks Act
RNAS6	Remote and Natural Area - Schedule 6, National Parks Act
RPA	Registered Property Agreement
RR	Regional Reserve

RSR	**Resources Reserve**
S5G	**5(1)(g) Reserve**
S5H	**5(1)(h) Reserve**
SCA	**State Conservation Area**
SH	**Shipwreck Reserve**
SMPR	**Southern Mallee Private Reserve**
SP	**State Park**
SR	**State Reserve**
SWR	**Special Wildlife Reserve**
WP	**Wilderness Park**
WPA	**Wilderness Protection Area**
WZ	**Wilderness Zone**

Appendix 2 - Authority Code

Authority_code	Authority_name
AAD	Australian Antarctic Division
ACT_EPSDD	ACT Environment, Planning and Sustainable Development Directorate
AWC	Australian Wildlife Conservancy
AWC_BA	Australian Wildlife Conservancy and Birds Australia
AWC_DAM	Australian Wildlife Conservancy and Dambimangari People
AWC_DD	Australian Wildlife Conservancy and Department of Defence
AWC_DPAW	Australian Wildlife Conservancy and Department of Parks and Wildlife WA
AWC_TLLFW	Australian Wildlife Conservancy and Tony and Lisette Lewis Foundation WildlifeLink
AWC_YC	Australian Wildlife Conservancy and Yulmbu Community
BCT_NSW	NSW Biodiversity Conservation Trust
BHA	Bush Heritage Australia
BHA_NTWA	Bush Heritage Australia and National Trust of Western Australia
BRC_TAS	Burnie Council
CCC_TAS	Clarence City Council
DCC_TAS	Devonport City Council
DCCEEW	Department of Climate Change, Energy, the Environment and Water
DRC_TAS	Dorset Council
EAC_QLD	Ewamian Aboriginal Corporation
EL_NSW	Enduring Landscapes Inc
FC_NSW	Forestry Corporation of NSW
FUA	Federation University Australia
GBRMPA	Great Barrier Reef Marine Park Authority
GCC_NSW	Gosford City Council
GCC_TAS	Glenorchy City Council
HCR_CMA	Hunter Central Rivers Catchment Management Authority
ILC	Indigenous Land Corporation
IMG	Indigenous Management Group
KNC_TAS	Kingborough Council
KRGC_NSW	Ku-ring-gai Council
LCC_TAS	Launceston City Council
LILC	Local Indigenous Land Council
MINCA_QLD	Magnetic Island Nature Care Association
NF_SA	Nature Foundation SA Inc
NMC_TAS	Northern Midlands Council
NRE_TAS	Department of Natural Resources and Environment Tasmania
NSC_QLD	Noosa Shire Council
NSW_DCCEEW	NSW Department of Climate Change, Energy, the Environment and Water
NSW_DPIRD	NSW Department of Primary Industries and Regional Development
NT_PWCNT	Parks and Wildlife Commission of the NT
NTWA	National Trust of Western Australia
PIRSA	Primary Industries and Regions South Australia
QLD_DAF	Queensland Department of Agriculture and Fisheries

QLD_DES	Queensland Department of Environment and Science
QLD_PRIV	Private (miscellaneous), Queensland
RR	Rainforest Rescue
SA_DEW	South Australian Department for Environment and Water
SA_FRST	Forestry South Australia
SET	South Endeavour Trust
SHFT	Sydney Harbour Federation Trust
SMC_TAS	Southern Midlands Council - Tasmania
TAS_HYDRO	Hydro Tasmania
TAS_PAHSMA	Port Arthur Historic Site Management Authority
TAS_PRIV	Private (miscellaneous), Tasmania
TAS_VAR	Various managing authorities - Tasmania
TAS_WATER	TasWater
TAS_WPMT	Wellington Park Management Trust
TFN_QLD	Queensland Trust for Nature
TFN_VIC	Trust for Nature Victoria
TLC	Tasmanian Land Conservancy Inc
TSRA	Torres Strait Regional Authority
VIC_DEECA	Victorian Department of Energy, Environment and Climate Action
WA_DBCA	Department of Biodiversity, Conservation and Attractions
WA_DPIRD	Western Australian Department of Primary Industries and Regional Development
WAC	Winangakirri Aboriginal Corporation

Appendix 3 - Datasource Code

Datasource_code	Datasource_name
AAD	Australian Antarctic Division
ACT_EPSDD	ACT Environment, Planning and Sustainable Development Directorate
AWC	Australian Wildlife Conservancy
BHA	Bush Heritage Australia
BHA_NTWA	Bush Heritage Australia and National Trust of Western Australia
DCCEEW	Department of Climate Change, Energy, the Environment and Water
DCCEEW_NRSP	Australian Government, Department of Climate Change, Energy, the Environment and Water - National Reserve System Program
FC_NSW	Forestry Corporation of NSW
GBRMPA	Great Barrier Reef Marine Park Authority
LHI_Board	Lord Howe Island Board
